## LED RESIDENTIAL LIGHTING

Lumina Lighting was founded in 2008, specializing in LED Residential Lighting design and manufacture. We offer practical solutions to an array of interior LED Residential lighting application. We see our customer requirements with a big spectrum of perfect customized lighting solutions, such as architecture projects, the highest level of quality is the common base of all lighting components and it is only good when everything fits perfectly, we always check all details to catch our target, supply high level quality Residential lighting to our customers with reasonable price. With our R&D we are improving our products for the market. All led lighting and components will be checked strictly before using.

In details we are always looking for less glare, better light output, the best color rendering, the highest efficiency, easier using products and longer lifespan even at hard environment condition. Meanwhile, different projects have different requirement, so we also have a big range of solutions to support our customers. We not only provide the standard size for our products, but also design and manufacture customized products and give professional idea for lighting projects.

Lumina Lighting always do anything to work as partner for our customers, our target is let Lumina become a well-known brand in LED Residential lighting field, let' s grow together.

The Sales team of Lumina look forward to discussing your requirements and cooperating with you in the near future.
